DELSU, Abraka, Delta State

Date:
Wednesday, February 18, 2026

Presented to:
DANTOWN®

Theme:
Unlocking The Opportunities in Blockchain Technology:

From Campus to the Global Stage

Event Overview

On Wednesday, February 18, 2026, the Crypto Bootcamp Community successfully hosted the *"Blockchain Without Borders"* Campus Edition at Delta State University (DELSU), Abraka.

Under the theme *"Unlocking The Opportunities in Blockchain Technology: From Campus to the Global Stage,"* the event was designed to bridge the gap between academic theory and the practical, lucrative world of Web3.

Executive Summary

The **Blockchain Without Borders (BWB) Conference: Campus Edition** held at Delta State University (DELSU), Abraka, marked a significant milestone in our continent-wide mission to bring blockchain technology into everyday life.

BWBCON is engineered for mass adoption, moving blockchain beyond speculation and into real utility for Africa's 1.2 billion people. By convening students, young innovators, and changemakers, the DELSU edition served as a high-potential gateway to onboard the next generation of users, investors, and service providers into the ecosystem.

This activation was specifically designed to bridge the gap between academic theory and the practical, lucrative world of Web3. The primary objective was to attract and mobilize a critical mass of active users ready for real platform engagement.

At the center of this movement was **Dantown**, positioned as the primary bridge for students to transition from campus learning to global digital participation.

By strategically choosing DELSU, Abraka, for this edition, Dantown secured a critical first-mover advantage. Unlike the saturated and highly competitive markets of developed cities, where blockchain events are frequent and audiences are often over-extended, the Abraka activation allowed Dantown to penetrate an entirely new

and untapped demographic. This was an opportunity to own the conversation in a region where student enthusiasm is high but direct brand engagement is rare.

While the physical hall hosted a concentrated group of **200–300 core enthusiasts,** the event's influence was far more expansive. Through a strategic "campus storm" and digital mobilization, we achieved over **1,000 high-intent registrations** and reached a total of **5,000+ individuals** on ground. This reflects the extensive reach and enthusiastic interest within the DELSU community.

By integrating Dantown into this pan-industry movement, we have successfully unlocked opportunities for growth and inclusion, gaining direct access to a ready market and influencing the onboarding of hundreds of new users in the Delta region.

The Numbers & Reach

We measure the success of the Campus Edition not just by the seats filled, but by the ecosystem impact and the data footprint left behind.

- **1,000+ Digital Registrations:** High-intent leads captured via Luma, representing a database of students specifically interested in Dantown's offerings.
- **5,000+ Physical Impressions:** Intensive on-ground publicity (flyering, banners, and word-of-mouth) across DELSU, ensuring Dantown was the most talked-about brand on campus last week.
- **5,000+ Social Media & Community Reach:** Viral awareness across WhatsApp status updates, student group chats, and X (Twitter), extending the event's influence beyond the university walls.
- **250+ Concentrated Attendees:** A curated audience of young professionals, student entrepreneurs, and crypto-curious individuals who engaged directly with the speakers and the brand.

Brand Visibility & Engagement

Dantown was the focal point of the day. From the entrance to the main stage, the branding was positioned to ensure that every attendee and even those passing by associated "Blockchain Opportunity" with the Dantown

logo.

The presence of the Dantown team allowed for direct, high-value conversations with the university's top influencers and student leaders.

Testimonials

Student Leader, DELSU:
"The energy at DELSU was unmatched. Seeing a brand like Dantown come directly to our campus shows they actually care about our financial growth, not just our trades."

Victory, Attendee:
"Before this conference, I only heard the buzzwords. Now, I've gained actual insights into Web3, Crypto, and how Blockchain works in the real world. This was the eye-opener I needed."

The Road Ahead: What's Next?

The DELSU Campus Edition has opened a massive door. With over 1,000 registered leads, we have the perfect foundation for a Phase 2 follow-up. We propose the following to maximize the ROI for Dantown:

- **The "Dantown DELSU" Referral Contest:** We are launching an exclusive post-event referral competition targeted at the DELSU community and our 1,000+ registrants. Students will compete to onboard new users to the Dantown platform, with the highest referrers winning premium prizes. This transforms our attendees into active brand ambassadors, exponentially increasing Dantown's reach across the university.

- **Targeted Onboarding Drive:** Using the Luma registration database, we will execute a follow-up campaign to ensure every student who showed interest completes their Dantown registration. We will tie the referral contest to this drive, encouraging the initial 1,000 leads to bring their peers into the ecosystem.

- **Strategic Merchandise Distribution:** We propose using the branded merchandise for a *"Dantown Campus Ambassadors"* kickoff or as rewards for the first 50 students from the Luma list who hit a

specific trading volume. This ensures the items are used to drive actual revenue rather than just being handed out.

- **Dantown "After-Action" Virtual Masterclass:** To satisfy the demand we saw on the ground in Abraka, we can host a specialized webinar for the DELSU community. This would allow Dantown reps to engage with the audience in a more controlled, structured environment to deep-dive into product features.

- **Expansion to Other Delta State Campuses:** Based on the massive "Publicity Reach" (5,000+ impressions) we achieved at DELSU, we have the blueprint to take this to other satellite campuses, applying the lessons learned here to ensure even smoother execution.

Conclusion

The *"Blockchain Without Borders"* DELSU edition was a vital step in capturing the Delta State student market. We successfully made Dantown the most visible crypto brand in Abraka. While the physical session was a concentrated gathering of core enthusiasts, the massive digital and on-ground awareness has set the stage for long-term user acquisition.

We appreciate the Dantown team for their active participation and for witnessing the raw potential of the DELSU student body. We look forward to converting this massive "spark" into a long-term flame of adoption.

Thank you for your partnership.
